

## Guideline for Affiliate Adstream Dashboard

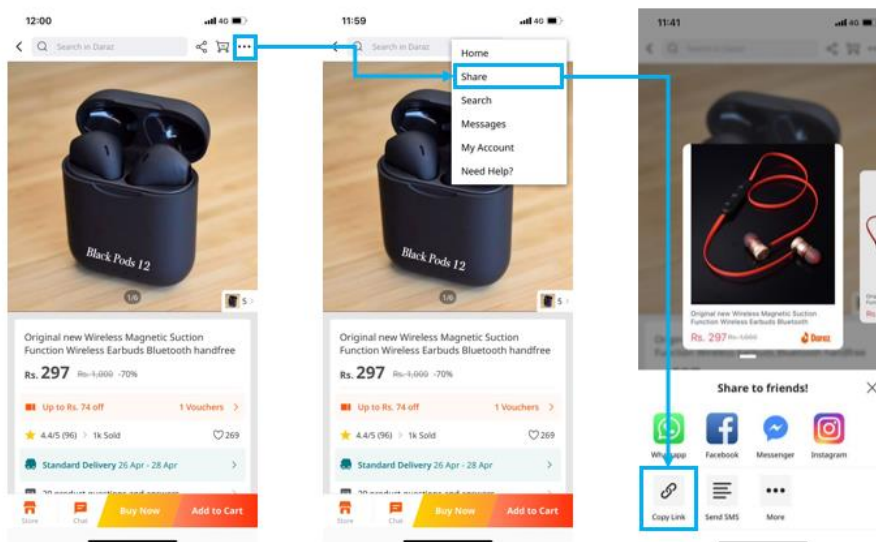

### Three ways to generate links

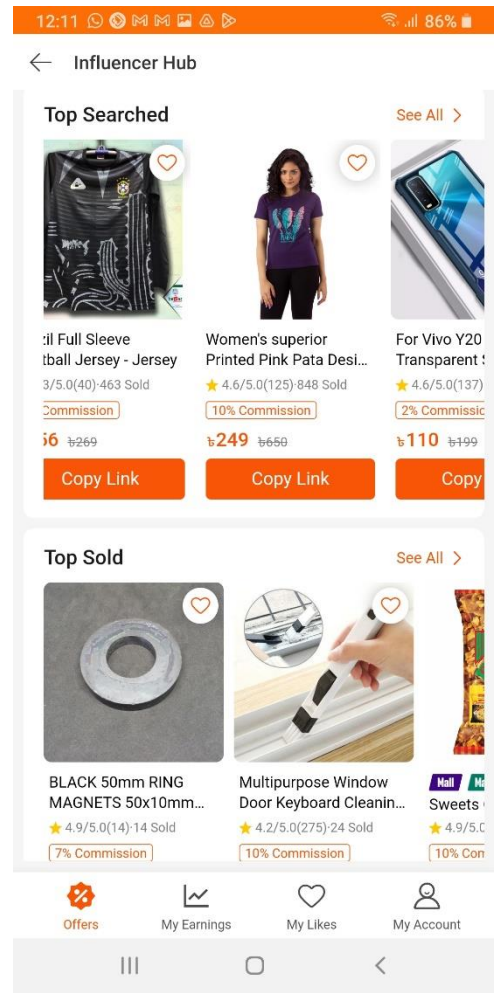

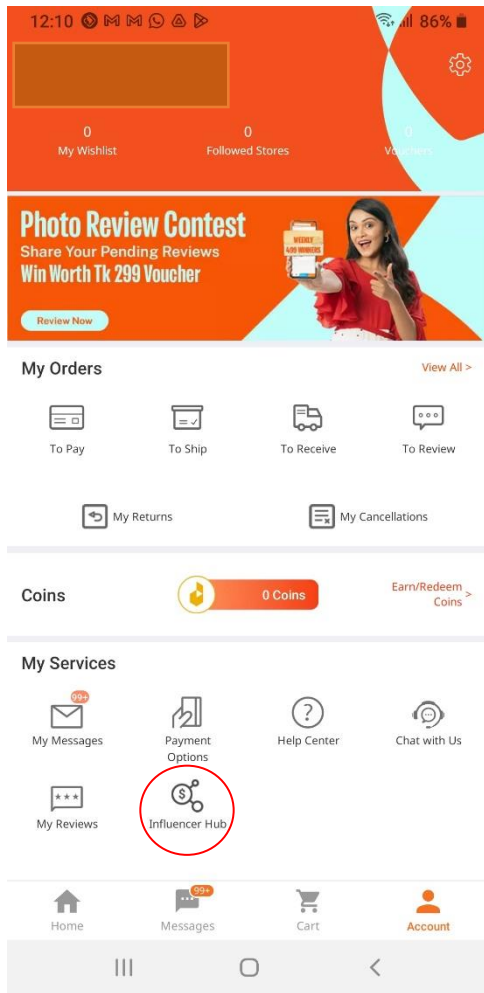

**Way 1.** Go to your Daraz app and Log in with the email that you used to create Daraz account through Daraz App. Choose any product from any category that you want to promote and then copy the Product page URL. Now, simply **promote** that link on your preferred platforms.

### Feature Update: Auto Generation of Adstream Link from PDP Share Button

**Description:** Currently, when an affiliate user copies a product link using the PDP share button, the generated link is a shortlink that cannot be converted into an affiliate link using Adstream.

This new update will automatically convert the product link into an affiliate link when an affiliate user copies it from the 'Copy Link' Option in the Share Button on PDP.

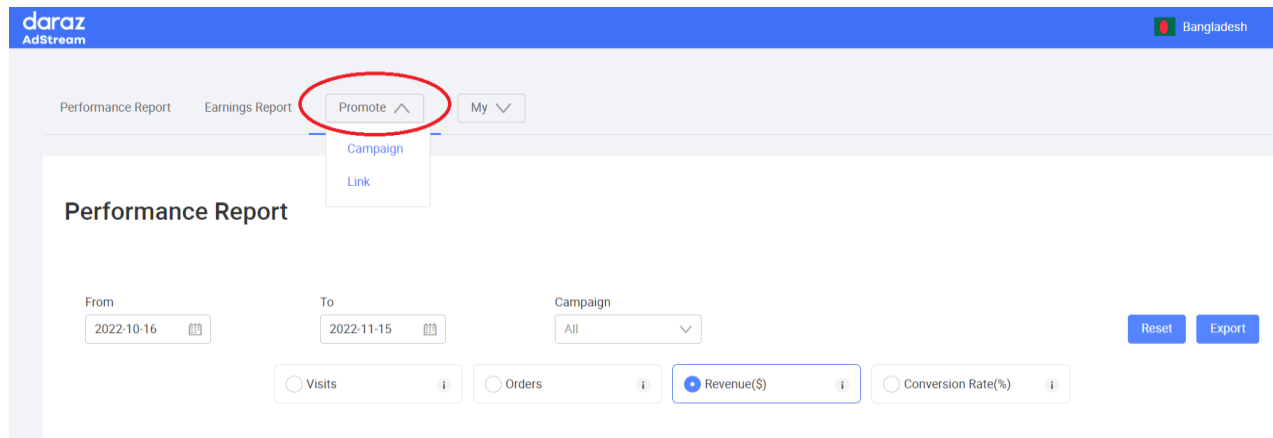

**Way 2.** You can also promote product links that are **top sold** and **top searched** simply by going to Daraz app and clicking Influencer Hub as shown on the pictures above.

**Way 3. Click on the link** below that will take you to the Daraz Adstream Portal link. Log in with the email that you used to create Daraz account through Daraz App.

You can promote campaign links by going to this link.

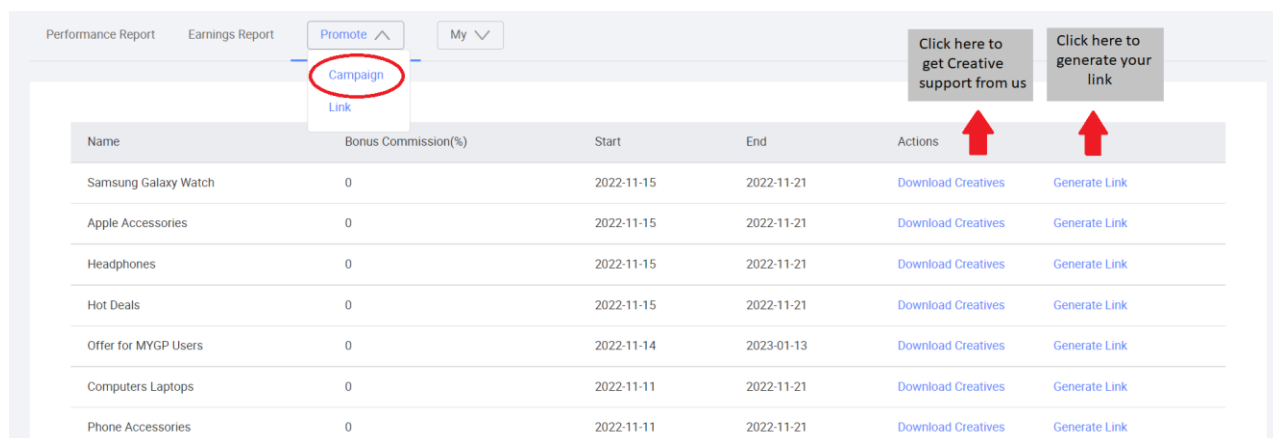

**Dashboard link:** <http://adstream.daraz.com.bd/>

Once you land to your Adstream page, you will see an option ‘**promote**’ on top of the page.

Click on it and you will see there are **two ways you can generate & promote your affiliate link**:

**Campaign-** Pick any campaign that you see running on your **Adstream** suggested by us from here. We show the items for you that are trending, bestselling and high order generated deals, etc. You will also get creative support from us for every campaign you want to promote.
